

February 1, 2018

Dear Valued Customer,

Bennett Tool & Die is pleased to announce that as of February 1, 2018, we have acquired Hurst Tool & Stamping. Hurst was founded in 1984 and is ISO 9001 certified company. They currently employ approximately 40 associates on one shift at their 80,000 square foot facility in Maryville, TN. Maryville is part of the Knoxville, TN metropolitan area.

Hurst's current products and services include precision metal stamping, the production of welded assemblies, precision machining, custom-metal fabrication as well as the production of stamping dies and plastic injection molds. Hurst operates 13 presses from 60 to 500 tons and has laser cutting and press brake capabilities as well.

The addition of Hurst into the Bennett organization significantly increases our stamping and tool building capacity. It gives our company a bigger regional footprint in the southeast and gives us in excess of 200,000 square feet of manufacturing space in three locations.

We look forward to continuing to serve you and look forward to passing on the benefits of this new partnership to you, our loyal customers.

Sincerely,

John Lanier
President & CEO
